

Project: OBetha I Acoustic Diffuser.

Subject: Diffuser wall installation / Instalación de Difusores OBetha I en paredes.

Date: 3/17/2006.

OBetha I wall Installation / Instalación del Difusor OBetha I sobre pared

Clean the wall surface. Check for no considerable surface irregularities.

Put on a pair of **surgery gloves**. Just to keep everything white.

Carefully unpack the **OBetha I Acoustic Diffuser** as said in the **User Manual**.

Always use **non solvent adhesives**.

Put some adhesive on the back of the **OBetha I Diffuser** to be installed.

On the (gypsum) wall put some "no head" nails as you see in the pictures below.

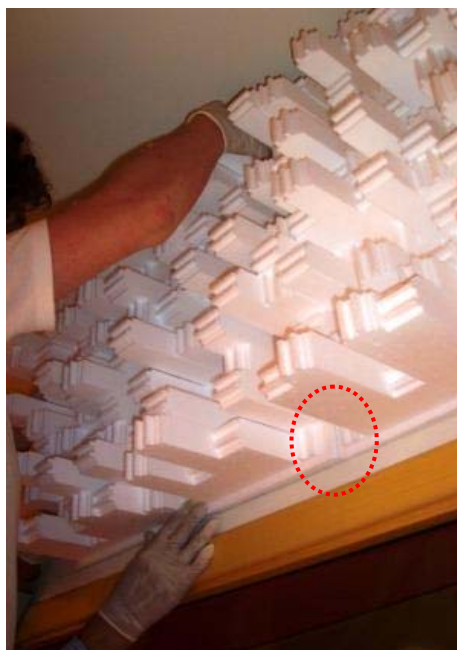

Add some (non solvent) adhesive on the wall as you see in the picture below.

Hang carefully the Diffuser unit by its edges and press it to the wall as indicates the red arrow in the picture below.

Be careful to make coincident both edges of contiguous Diffuser units as you may see in the picture below.

Enjoy your installation!!

Our Diffusers will give your microphone takes, auditions, reproductions and performances spaciousness and envelopment, controlling hard reflections and smoothing the sound decay.
